

How Grade 3 students in Escondido, California are having fun learning Math.

March 2015, Escondido, California:

Grade 3 students in Ms. Brackx's class at Pioneer Elementary School in Escondido, California are having a fun time learning math. The class recently got iPads, and while searching for apps that were fun and easy to use, Ms. Brackx discovered the rich educational content of LogTera Math app.

Ms. Brackx decided to try **LogTera Grade 3 Math, winner of 2014 Best App awards** by Balefire Labs. The app was ideal for her class as it had a fun, interactive theme, was engaging for her students, and it covered all topics aligned to Common Core State Standards.

Ms. Brackx's students are now using this app to practice math concepts learned in the class and to preview upcoming math topics. The learners are **more engaged** with the rich assortment of visual models, realistic word problems, and fun games.

Ms. Brackx is now able to monitor her students' progress with the teacher dashboard. This gives her more visibility and time to focus on individual learner needs and areas that need more work.

Kids Chatter

"I love this game! It's so much fun!" - Cesar

"I just earned 90 coins! I'm going shopping to buy some new things." -

Brianna

"I think it is fun and pretty awesome!" - Guillermo

"I like how the animals are animated and how they dance!" - Nahomi

"I like how the questions match what we are learning in class." - Juan

"I like feeding the animals" - Emilyn

"I loved how excited my kids were to practice their math skills. It was a great way for my students to work at their own level and practice their math skills. I like being able to see how my students are doing on each math topic. The CCSS coverage is great with visual models and word problems." - Ms. Brackx, Grade 3 Teacher (Escondido, CA)
